

# ED Summary Report

## MiPCT Dashboard

► QUICK REFERENCE

### About the ED Summary Report

Each row in the ED Summary Report includes high-level information about the ED visits for a participating patient during the **most recent six months** of complete data available. The date range is included in the report header.

There is separate ED Summary Report for each practice in your PO. The reports are sorted by Payer Specific Member ID.

### Location

You can view and print the ED Summary Report from the *Download PO Reports* page of the MiPCT Dashboard. It is included in the <PO Name>\_Reports\_YYYY\_MM.zip file.

For additional information, see the PO Reports chapter in the [MiPCT Dashboard User Guide](#).

ED Summary Report Most Recent 6 months (April 2015 - September 2015)														
Attributed Practice Unit Name: <span style="float: right;">A</span> <span style="float: right;">B</span>

# ED Detail Report

▷ QUICK REFERENCE

---

## A: Patient Identification Information

The first 11 columns provide attributed patient information.

## B: Summary ED Visit Information

The following table provides information about the ED visit-related columns:

Column Heading	Description
Total ED visits	The number of times the patient has visited the ED during the reporting period. <b>NOTE:</b> All ED visits are new for the first report (released March 7, 2013).
Most Recent ED Visit Date	The date of the patient's most recent ED visit
Total PCS Rate	The number of ED visits likely to be Primary Care Sensitive (PCS) MDC uses the NYU Algorithm to calculate the PCS Probability. For more information about the NYU Algorithm, see <a href="http://wagner.nyu.edu/faculty/billings/nyued-background.php">http://wagner.nyu.edu/faculty/billings/nyued-background.php</a> .
Asthma ED Visits for Previously Diagnosed Asthma	The number of asthma-related ED visits during the reporting period for patients who were previously diagnosed with asthma.
