JANUARY 28, 2020

## CHIR Dashboard Release 11.0 Posted!

Release 11.0 of the CHIR Dashboard is now available!

### Data Updates

Release 11.0 includes the following Medicaid data:

- A 12-month measurement period with dates of service between October 1, 2018 through September 30, 2019.
- Paid claims data through November 2019 (allowing for a two-month run-out period).
- Patients and provider attribution from the September 2019 PCMH Patient List and Provider Hierarchy File.
- Retroactive providers and their associated beneficiaries that apply to the reporting period were removed.

### Data Destruction Notes

MDC will be reaching out to your organization this month with details on data destruction. Some key dates to be aware of:

- MDC will remove all reports containing personally-identifiable from the dashboard download page by the end of January 2020. Reports included: PCMH Patient Lists, Payment Adjustment, and PCMH Care Coordination and Claims Detail.
- Your organization will be asked to attest to the removal of all SIM PCMH related PHI by the end of March 2020.

### Documentation

You can access the following support documentation to help you navigate and use the Dashboard. The following documents are located on the SIM CHIR Support page of the MDC Website:

- [Release Notes](#) – Information about the enhancement, including any known issues.
- [User Guide](#) – Includes descriptions of the Dashboard components, instructions for using the features, and detailed information about the data.
- [Dashboard Timeline](#) – Displays date-specific information about the data included in the Dashboard.
- [Technical Guide](#) – Provides detailed information about each measure included in the Dashboard.

### Dashboard Access Information

- Information and detailed instructions for accessing the CHIR Dashboard can be found in the [Accessing the CHIR Dashboard guide](#).
- If you are having difficulty exporting from the Dashboard, please contact us at [MichiganDataCollaborative@med.umich.edu](mailto:MichiganDataCollaborative@med.umich.edu).

NOVEMBER 1, 2019

## CHIR Dashboard Release 10.0 Posted!

Release 10.0 of the CHIR Dashboard is now available! Please note that this is the FINAL Dashboard release for the SIM CHIR project.

### Data Updates

Release 10.0 includes the following Medicaid data:

- A 12-month measurement period with dates of service between July 1, 2018 through June 30, 2019.
- Paid claims data through August 2019 (allowing for a two-month run-out period).
  - The August 2019 paid claims file was received on September 16, 2019.
- Patients and provider attribution from the June 2019 PCMH Patient List and Provider Hierarchy File.
- The following data was removed:
  - Retroactive providers and associated beneficiaries
  - Beneficiaries that died in 2018
  - October, November, and December 2018 beneficiaries that were incarcerated, deceased, or in SNF

### Documentation

You can access the following support documentation to help you navigate and use the Dashboard. The following documents are located on the SIM CHIR Support page of the MDC Website:

- [Release Notes](#) – Information about the enhancement, including any known issues.
- [User Guide](#) – Includes descriptions of the Dashboard components, instructions for using the features, and detailed information about the data.
- [Dashboard Timeline](#) – Displays date-specific information about the data included in the Dashboard.
- [Technical Guide](#) – Provides detailed information about each measure included in the Dashboard.

### Dashboard Access Information

AUGUST 2, 2019

## CHIR Dashboard Release 9.0 Posted!

Release 9.0 of the CHIR Dashboard is now available!

### Data Updates

Release 9.0 includes the following Medicaid data:

- A 12-month measurement period with dates of service between April 1, 2018 through March 31, 2019.
- Paid claims data through May 2019 (allowing for a two-month run-out period).
- Patients and provider attribution from the March 2019 PCMH Patient List and Provider Hierarchy File.

### Additional Clinical Data Included

MDC worked with MiHIN to resolve an issue with the January through March 2019 data for some organizations. MiHIN recently released an updated 2018 code list that has been applied to historical data to include additional clinical records.

### Utilization Measures

MDC identified an issue that affected the *Acute Hospital Admissions* and *All-Cause Readmission* measures in Release 8.0 (January 2018 through December 2018 reporting period). A subset of more recent data was inadvertently excluded from processing causing these results to be artificially low. MDC re-ran these measures, and the updated data is included on the Dashboard. The *All-Cause Readmission* measure was re-processed using data paid through May 2019

### Documentation

You can access the following support documentation to help you navigate and use the Dashboard. The following documents are located on the SIM CHIR Support page of the MDC Website:

- [Release Notes](#) – Information about the enhancement, including any known issues.
- [User Guide](#) – Includes descriptions of the Dashboard components, instructions for using the features, and detailed information about the data.
- [Dashboard Timeline](#) – Displays date-specific information about the data included in the Dashboard.
- [Technical Guide](#) – Provides detailed information about each measure included in the Dashboard.

### Dashboard Access Information

- Information and detailed instructions for accessing the CHIR Dashboard can be found in the [Accessing the CHIR Dashboard guide](#).
- If you are having difficulty exporting from the Dashboard, please contact us at [MichiganDataCollaborative@med.umich.edu](mailto:MichiganDataCollaborative@med.umich.edu).

MAY 24, 2019

## CHIR Dashboard Enhancement 8.01 Posted!

Enhancement 8.01 of the CHIR Dashboard is now available!

### Diabetes Measure Updates

Programming methodologies were aligned to correct a small difference in the denominators of the five diabetes measures. The difference did not affect overall percentages or prevent any organizations from meeting the benchmark, but caused the exclusion of about 30 out of the approximately 14,000 members. MDC corrected the issue and re-ran the following measures for all reporting periods:

- Diabetes: Blood Pressure Control
- Diabetes: Eye Exam
- Diabetes: HbA1c Poor Control
- Diabetes: HbA1c Testing
- Diabetes: Nephropathy

### Documentation

You can access the following support documentation to help you navigate and use the Dashboard. The following documents are located on the SIM CHIR Support page of the MDC Website:

- [Release Notes](#) – Information about the enhancement, including any known issues.
- [User Guide](#) – Includes descriptions of the Dashboard components, instructions for using the features, and detailed information about the data.
- [Dashboard Timeline](#) – Displays date-specific information about the data included in the Dashboard.
- [Technical Guide](#) – Provides detailed information about each measure included in the Dashboard.

### Dashboard Access Information

APRIL 30, 2019

## CHIR Dashboard Release 8.0 Posted!

MDC is excited to announce that Release 8.0 of the CHIR Dashboard is now available!

### Data Updates

Release 8.0 includes the following Medicaid data:

- A 12-month measurement period with dates of service between January 1, 2018 through December 31, 2018.
- Paid claims data through February 2019 (allowing for a two-month run-out period).
- Patients and provider attribution from the December 2018 PCMH Patient List and Provider Hierarchy File.

### Documentation

You can access the following support documentation to help you navigate and use the Dashboard. The following documents are located on the SIM CHIR Support page of the MDC Website:

- [Release Notes](#) – Information about the release, including any known issues.
- [User Guide](#) – Includes descriptions of the Dashboard components, instructions for using the features, and detailed information about the data.
- [Dashboard Timeline](#) – Displays date-specific information about the data included in the Dashboard.
- [Technical Guide](#) – Provides detailed information about each measure included in the Dashboard.

MARCH 8, 2019

## CHIR Dashboard Release 7.0 Posted!

MDC is excited to announce that Release 7.0 of the CHIR Dashboard is now available!

### Data Updates

Release 7.0 includes the following Medicaid data:

- A 12-month measurement period with dates of service between October 1, 2017 through September 30, 2018.
- Paid claims data through November 2018 (allowing for a two-month run-out period).
- Patients and provider attribution from the September 2018 PCMH Patient List and Provider Hierarchy File.
- All measures were re-run to account for multiple HEDIS versions, updated measure definitions, and to include measure results for all measures in each release.

### New Trend Page Added

This page displays a trend line graph for each quality, utilization, and ACSC measure to show performance over time.

### Documentation

You can access the following support documentation to help you navigate and use the Dashboard. The following documents are located on the SIM CHIR Support page of the MDC Website:

- [Release Notes](#) – Information about the release, including any known issues.
- [User Guide](#) – Includes descriptions of the Dashboard components, instructions for using the features, and detailed information about the data.
- [Dashboard Timeline](#) – Displays date-specific information about the data included in the Dashboard.
- [Technical Guide](#) – Provides detailed information about each measure included in the Dashboard.

### Dashboard Access Information

NOVEMBER 12, 2018

## CHIR Dashboard Enhancement 6.01 Posted!

MDC is excited to announce that Enhancement 6.01 of the SIM CHIR Dashboard is now available!

### ACSC Measures Added

MDC added the ACSC page, which includes the following adult and pediatric composite Ambulatory Care Sensitive Condition Hospitalization measures:

- Adult Acute Composite
- Adult Chronic Composite
- Adult Diabetes Composite
- Adult Overall Composite
- Pediatric Acute Composite
- Pediatric Chronic Composite
- Pediatric Overall Composite

Each composite measure is comprised of a subset of ACSC measures, which are listed under each measure. The composite ACSC measures and rates are also listed on the Executive Summary page.

For additional details, including a full list of measures included in the composite measures, see the ACSC Chapter of the [Technical Guide](#).

### Documentation

You can access the following support documentation to help you navigate and use the Dashboard. The following documents are located on the SIM CHIR Support page of the MDC Website:

- [Release Notes](#) – Information about the release, including any known issues.
- [User Guide](#) – Includes descriptions of the Dashboard components, instructions for using the features, and detailed information about the data.
- [Dashboard Timeline](#) – Displays date-specific information about the data included in the Dashboard.
- [Technical Guide](#) – Provides detailed information about each measure included in the Dashboard.

### Dashboard Access Information

OCTOBER 31, 2018

## CHIR Dashboard Release 6.0 Posted!

Michigan Data Collaborative (MDC) is excited to announce that Release 6.0 of the CHIR Dashboard is now available!

### Data Updates

Release 6.0 includes the following Medicaid data:

- A 12-month measurement period with dates of service between July 1, 2017 through June 30, 2018.
- Paid claims data through August 2018 (allowing for a two-month run-out period).
- Patients and provider attribution from the June 2018 PCMH Patient List and Provider Hierarchy File.
- Incorporated QMI data from all organizations into applicable measures.

### Outcome Measures Added

The following new outcome measures were added:

- Adult BMI
- Diabetes Blood Pressure Control
- Diabetes HbA1c Poor Control
- Controlling High Blood Pressure
- Screening for Depression and Follow Up
- Tobacco Use Screening and Cessation
- Weight Assessment and Counseling

**IMPORTANT:** The *Screening for Depression and Follow Up* and *Tobacco Use Screening and Cessation* measures have small numerators. These are newer measures and organizations may not be collecting information in their EMR systems, or the extraction program may not be identifying all of the information that is needed to identify patients for the numerator. These measure results are likely to improve over time as more Quality Measure Information (QMI) data becomes available. Please contact MiHIN at [help@mihin.org](mailto:help@mihin.org) if you suspect there are issues with the collection/extraction of this data from your EMR system.

### Total Cost PMPM Added

MDC added Total Cost Per Member Per Month (PMPM) measure results to the Executive Summary page. You can view Total Cost PMPM data at the Project, Managing Organization, Practice or Provider level, based on your Report level selection on the Dashboard.

### ACSC Measures Coming in Enhancement 6.01

MDC will post Dashboard Enhancement 6.01 in the coming weeks, which will include Ambulatory Care Sensitive Condition (ACSC) measures. We will send out a notice when it is available.

AUGUST 3, 2018

## CHIR Dashboard Release 5.0 Posted!

Michigan Data Collaborative (MDC) is excited to announce that Release 5.0 of the CHIR Dashboard is now available!

### Data Updates

Release 5.0 includes the following Medicaid data:

- A 12-month measurement period with dates of service between April 1, 2017 through March 31, 2018.
- Paid claims data through May 2018 (allowing for a two-month run-out period).
- Patients and provider attribution from the March 2018 PCMH Patient List and Provider Hierarchy File.
- Added 2016 data to the **Tile** page to provide baseline information. This enables users to see changes over time.
- Additional QMI data was added to existing measures that are claims-based but supplemented with QMI.

### Dashboard Updates

- Added the following utilization measure: **Preventable ED Visits**.

### Documentation

You can access the following support documentation to help you navigate and use the Dashboard. The following documents are located on the SIM CHIR Support page of the MDC Website:

- [Release Notes](#) – Information about the release, including any known issues.
- [User Guide](#) – Includes descriptions of the Dashboard components, instructions for using the features, and detailed information about the data.
- [Dashboard Timeline](#) – Displays date-specific information about the data included in the Dashboard.
- [Technical Guide](#) – Provides detailed information about each measure included in the Dashboard.

JUNE 15, 2018

## CHIR Dashboard Enhancement 4.01 Posted!

Michigan Data Collaborative (MDC) is excited to announce that enhancement 4.01 of the CHIR Dashboard is now available!

### Updated Utilization Measures

MDC updated the following utilization measures to align with HEDIS and provide a more accurate measure for PCPs by limiting utilization to acute stays (opposed to surgery or planned admissions).

- All-Cause Readmission
- Emergency Department Visits
- Acute Hospital Stays

For additional information about the measures, see the [Dashboard Release Notes](#) and the [Technical Guide](#).

### Documentation

You can access the following support documentation to help you navigate and use the Dashboard. The following documents are located on the SIM CHIR Support page of the MDC Website:

- [Release Notes](#) – Information about the enhancement, including any known issues.
- [User Guide](#) – Includes descriptions of the Dashboard components, instructions for using the features, and detailed information about the data.
- [Dashboard Timeline](#) – Displays date-specific information about the data included in the Dashboard.
- [Technical Guide](#) – Provides detailed information about each measure included in the Dashboard.

### Dashboard Access Information

APRIL 30, 2018

## CHIR Dashboard Release 4.0 Posted!

Michigan Data Collaborative (MDC) is excited to announce that release 4.0 of the CHIR Dashboard is now available!

### Data Updates

Release 4.0 includes the following Medicaid data:

- A 12-month measurement period with dates of service between January 1, 2017 through December 31, 2017.
- Paid claims data through February 2018 (allowing for a two-month run-out period).
- Patients and provider attribution from the December 2017 PCMH Patient List and Provider Hierarchy File.
- Added quality measure information (QMI) data to existing measures.

**NOTE:** We have not received QMI data from some organizations. We are working to receive the complete data set.

### Dashboard Updates

- Added Diabetes as a chronic condition on the Overview page.
- Bar graphs now have a horizontal orientation (instead of vertical).

### Documentation

You can access the following support documentation to help you navigate and use the Dashboard. The following documents are located on the SIM CHIR Support page of the MDC Website:

- [Release Notes](#) – Information about the release, including any known issues.
- [User Guide](#) – Includes descriptions of the Dashboard components, instructions for using the features, and detailed information about the data.
- [Dashboard Timeline](#) – Displays date-specific information about the data included in the Dashboard.
- [Technical Guide](#) – Provides detailed information about each measure included in the Dashboard.

### Dashboard Access Information

FEBRUARY 28, 2018

## Initial Release of the CHIR Dashboard Posted!

Michigan Data Collaborative (MDC) is excited to announce that the initial release of the CHIR Dashboard is now available!

### About the Dashboard

The CHIR Dashboard enables you to view SIM PCMH Medicaid data aggregated at the CHIR level to explore population, quality of care, and utilization. All reporting is aggregated to the CHIR level, and is not available by PO, Practice, or patient. All data is limited to the SIM PCMH population based on the POs and Practices participating in the initiative.

Each page of the Dashboard aggregates data based on the following Community Health Innovation Regions (CHIRs):

- Jackson
- Muskegon
- Washtenaw and Livingston
- Genesee
- Northern Michigan

### Data

This release includes the following data:

- A 12-month measurement period with dates of service between October 1, 2016 through September 30, 2017
- Paid claims data through November 2017 (allowing for a two-month run-out period)
- Patients are identified in the September 2017 PCMH Patient List, and the practice-to-CHIR mapping was provided in the Provider Hierarchy File.

### Documentation

You can access the following support documentation to help you navigate and use the Dashboard. The following documents are located on the SIM CHIR Support page of the MDC Website:

- [Release Notes](#) – Information about the release, including any known issues.
- [User Guide](#) – Includes descriptions of the Dashboard components, instructions for using the features, and detailed information about the data.
- [Dashboard Timeline](#) – Displays date-specific information about the data included in the Dashboard.
- [Technical Guide](#) – Provides detailed information about each measure included in the Dashboard.
